About Greenconn

Established in 1998, Greenconn is a leading provider of connector solutions, offering highly reliable interconnect products and customized solutions with its vertically integrated supply chain advantages. Our main products cover automotive, floating, high-speed, IDC, I/O and other board-to-board/wire-to-board connectors, widely used in industrial, automotive, telecommunication, medical and consumer electronics.

At Greenconn, quality is of the essence. From product design and development, tooling manufacturing, terminal stamping, surface plating, and injection molding, to assembly automation and packaging, we provide customers with one-stop production services and strictly adhere to international standards such as ISO 9001, IATF 16949, ISO 45001, ISO 13485, and other quality requirements to ensure product quality.
